## Health Classes

### HLTH 51: First Aid & CPR

The standard first aid and CPR skills a person needs to know as the first link in the emergency medical services system. The focus is to prepare the participants to respond correctly in emergencies.

**Credits 1**

**Weekly Contact Hours 1**

**Meets Degree Requirements For**

Restricted Elective

### HLTH 123: Medical Terminology

Prepares students for beginning studies in allied health careers. Includes study of terms in anatomy, physiology and pathology through word analysis with emphasis on word parts: prefix, root and suffix. Also covered are medical abbreviations and pathologic terms used for common medical diagnoses, diagnostic tests and operative procedures.

**Credits 3**

**Weekly Contact Hours 3**

**Meets Degree Requirements For**
